

Make your life *easier*

Sou - Earphones - TWS wireless earphones

ONYX TWS wireless headphones with active noise reduction

IMMERSIVE SOUND, UNPARALLELED STYLE

ONYX ANC earphones are the optimal solution to give you a unique musical experience. The in-ear format provides exceptional sound power and deep bass, providing isolation from surrounding sounds. In addition to this, enjoy 2 specific listening modes:

- Active noise reduction up to 28 dB for total immersion in your playlist.
 - Transparent mode to be open to the outside world and surrounding noise.
- Their fit in your ear and their ergonomics ensure complete freedom of movement, all with an overall battery life of more than 24 hours, including 6 hours of earphone battery life on a single charge. In addition, monitor the charge level of your case at any time with the LED indicator on it, and anticipate recharging it so that you never run out of battery.

The earphones feature touch control allowing you to manage volume and playback tracks with one touch. Thanks to the integrated microphone and ENC technology (reduction of surrounding noise), pick up and make clear calls without using your smartphone and enjoy unparalleled call quality.

The combination of the metallic finish on the earphones and the soft touch on the case makes ONYX ANC earphones a true fashion accessory, in addition to being a technological jewel.
