

Smartphon - Smartphone connectors - USB Type-C connectors

USB-C to USB-C magnetic sheath cable

YOUR CABLE ALWAYS TIDY WITHOUT EVER FORMING KNOTS

Discover our innovative cable with magnetic sheath, designed to meet all your charging and connection needs.

A unique innovation that combines durability, performance and practicality.

In addition to being made of braided nylon, the sheath is magnetic, which allows the cable to roll up on itself very easily. It is therefore very easy and practical to store and transport.

No more cables getting tangled with each other and forming knots, your cable is tidy, easy to unwind and use.

As this cable will never leave your side, we have chosen to use a braided sheath combining resistance and elegance with connectors reinforced with flexible and resistant plastic (TPE).

You can therefore use this cable without worrying about damaging it, it is designed to last.

Like all our other Type-C to Type-C cables, it is compatible with 60W charging power but also with data synchronization. It is therefore compatible with all your smartphones or other devices equipped with a USB-C port.

Its ideal length of 1.5 meters makes it usable everywhere, at home, in the car or even at work.

The cable with magnetic sheath is the essential accessory for all your electronic devices.

Combining robustness, efficiency and convenience, it is designed to simplify your daily life
