

## Magnetic holder for TESLA on-board computer

**YOUR MAGSAFE ROTARY PHONE HOLDER, SPECIALLY DESIGNED FOR ALL TESLA MODELS!**

Discover our dedicated holder for Tesla cars, to keep your phone close at hand and in sight during your daily journeys.

The holder attaches to the corner of your on-board computer and adapts to all computer formats.

Thanks to its adjustable attachment, this holder is compatible with all existing Tesla models: Tesla Model 3, Tesla Model X, Tesla Model Y and Tesla Model S.

Avoid any scratches or bumps thanks to the added silicone that protects your on-board computer and prevents direct contact with the bracket.

Its rotating arm allows you to change the angle of the mount by 180°, enabling you to adapt the mount to your needs and desires.

The support head can also be rotated, giving you the optimum position when driving, as well as adapting to the driver's position.

The support head is compatible with MagSafe technology, ensuring your smartphone stays securely in place. You don't have MagSafe technology? No problem, we'll supply you with a metal adhesive plate to stick onto your phone shell.
